

INDEX

- Achalasia of the cardia, 491; of the cardiac sphincter, 497.
- Acid, lactic, the origin and occurrence of, in human gastric contents, 175.
- Acidosis and debility, 393; variations in plasma bicarbonate in, 396; plasma chlorides in, 400; water content of the body in, 401.
- Adenosine, the action of, upon the human heart, 485; effects of, on heart beating with normal rhythm, 486; effects of, on heart presenting auricular fibrillation, 487.
- Aetiology and prognosis of auricular fibrillation, 309; relation to prognosis, 312.
- Albuminuria and plasma protein changes in lipid nephrosis, 103.
- Alkalaemia in the diarrhoea of infants, 171.
- Anaemia, in lipid nephrosis, 113; the liver treatment of, 213; pernicious, 213; associated with sprue and pregnancy, 219; secondary to haemorrhage, 221; secondary to other conditions, 221.
- Angina pectoris and auricular fibrillation, 319.
- Anginal pain, observations on the aetiological correspondence between, and cardiac infarction, 233.
- Arteries, coronary, the main branches of, in acute rheumatic carditis, 241.
- Auricular fibrillation, the aetiology and prognosis of, 309; aetiological varieties of, 309; relative incidence of embolism in mitral stenosis with and without, 314; and heart-block, 314; and angina pectoris, 319; and infective endocarditis, 321; effects of adenosine on heart presenting, 487.
- Basal metabolism in pulmonary tuberculosis, 87; in nephritis, 113.
- Baths, warm immersion, some effects of, upon the circulation, 327.
- Blood, viscosity, starvation and, 458; cholesterol, studies in biliary and hepatic disease, 465.
- Blood-pressure, a clinical method for the continuous registration of, 167; in sprue, 423; viscosity of the blood in high, 451; artificially lowering the viscosity and, 455; factors responsible for the increase of viscosity in, 458.
- Calcium and phosphorus metabolism in chronic diarrhoea with tetany, 195.
- Carcinoma of the lung causing intestinal obstruction by secondary deposits, 407.
- Cardia, achalasia of the, 491.
- Cardiac infarction, observations on the aetiological correspondence between anginal pain and, 233.
- Cardiospasm, so-called, 491.
- Carditis, acute rheumatic, the main branches of the coronary arteries in, 241.
- Cholesterol, blood, studies in biliary and hepatic disease, 465.
- Cholesterol metabolism and distribution, in lipid nephrosis, the disturbance of, 105; of nephritis, 110.
- Clinical method for the continuous registration of blood-pressure, 167.
- Coronary arteries in acute rheumatic carditis, the main branches of the, 241.
- Cutaneous fibromata, 152; pigmentation, 152.
- Debility, acidosis and, 393; variations in plasma bicarbonate in, 396; plasma chlorides in, 400; water content of the body in, 401.
- Deglutition, physiology of, 493.
- Diarrhoea, of infants, alkalaemia in, 171; with tetany, calcium and phosphorus metabolism in chronic, 195.
- Dosage and technique in oral and subcutaneous administrations of iron, 78.
- Dysentery, endemic bacillary, in Aberdeen, 245; treatment of, 251; bacteriological investigation, 254; spread and control of, 256.
- Effect of respiration and posture on electrical axis of normal heart, 68.
- Electrical axis of the heart as an indicator of changes in ventricular predominance, 67.
- Elephantiasis nervorum*, 154.
- Embolism, relative incidence of, in mitral stenosis with or without auricular fibrillation, 314.

- Embolism, paradoxical, 135; types of, 137; site of, 143; paradoxical and pulmonary, the relationship between, 145; with blood-clot lodged in foramen ovale, a case of, 305.
- Endemic bacillary dysentery in Aberdeen, 245; treatment of, 251; bacteriological investigation, 254; spread and control of, 256.
- Endocarditis, infective, auricular fibrillation and, 321.
- Fibrillation, auricular, the aetiology and prognosis of, 309; aetiological varieties of, 309; and heart-block, 314; and angina pectoris, 319; and infective endocarditis, 321; effects of adenosine on heart presenting, 487.
- Fibromata, cutaneous, 152.
- Fibrosis, the ventricular complexes in myocardial infarction and, 273; of the myocardium with electrocardiographic and post-mortem examinations, four cases of, 293.
- Foramen ovale, incidence and degree of patency of, 144; a case of paradoxical embolism with blood-clot lodged in, 305.
- Gastric contents, the origin and occurrence of lactic acid in human, 175.
- Heart, the electrical axis of, as an indicator of changes in ventricular predominance, 67; the action of adenosine upon the human, 485.
- Histamine, the action of, on the chloride content of the stomach, 447.
- Histological observations in oral and subcutaneous administration of iron experiments, 79.
- Infarction, cardiac, observations on the aetiological correspondence between anginal pain and, 233.
- Infarction, myocardial, and fibrosis, the ventricular complexes, 273.
- Intestinal obstruction by secondary deposits, carcinoma of lung causing, 407.
- Invalidism, chronic, a review of viscerop-tosis and allied abdominal conditions associated with, 1.
- Iron, storage of, following its oral and subcutaneous administration, 77; experiments, chemical findings in oral and subcutaneous administration of, 78; dosage and technique in oral and subcutaneous administration of, 78; histological observations in oral and subcutaneous administration of, 79.
- Lactic acid in human gastric contents, origin and occurrence of, 175.
- Liver treatment of anaemias, 213; cases of pernicious anaemia in, 213; anaemia associated with sprue and pregnancy in, 219.
- Lung, carcinoma of, causing intestinal obstruction by secondary deposits, 407.
- Metabolism, basal, in pulmonary tuberculosis, 87; in nephritis, 113.
- Metabolism, calcium and phosphorus, in chronic diarrhoea with tetany, 195.
- Metabolism, cholesterol, of nephritis, 110; the disturbance of, and distribution in lipid nephrosis, 105.
- Mucous membranes, neurofibromatosis of, 155.
- Myocardium, fibrosis of the, with electrocardiographic and post-mortem examinations, four cases of, 293.
- Nephritis, cholesterol metabolism of, 110; basal metabolism in, 113.
- Nephrosis, lipid, a study of so-called, 101; albuminuria and plasma protein changes in 103; anaemia in, 113; oedema in, 113; fate of thyroxin in treatment of, 129.
- Nerves, sympathetic and parasympathetic, neurofibromatosis of, 155.
- Nerve-trunks, neurofibromatosis of, 154.
- Neurofibromatosis, 151; of nerve-trunks, 154; of mucous membranes, viscera, and sympathetic and parasympathetic nerves, 155; osseous and periosteal manifestation of, 155.
- Neuroma, plexiform, 154.
- Observations on the aetiological correspondence between anginal pain and cardiac infarction, 233; on the respiratory exchange and basal metabolic rate in pulmonary tuberculosis, 85.
- Oedema in lipid nephrosis, 113.
- Osseous and periosteal manifestations of neurofibromatosis, 155.
- Pachydermatocoele, 154.
- Periosteal neurofibromatosis, 151.
- Physical findings in viscerop-tosis, 32.
- Plasma bicarbonate in disease, 403.
- Plasma chlorides in acidosis and debility, 400.
- Plasma protein changes in lipid nephritis, albuminuria and, 103.
- Plexiform neuroma, 154.
- Posture, and respiration, the effect of, on the electrical axis of normal hearts, 68.

- Pregnancy and sprue, associated with anaemia, 219.
- Proceedings of the Association of Physicians of Great Britain and Ireland, *at end*.
- Prognosis, the relation of aetiology to, 312; in the rheumatic group, the relation between age and, 313.
- Pulmonary gases, 89.
- Pulmonary tuberculosis, observations on the respiratory exchange and basal metabolic rate in, 85; basal metabolism in, 87; pulse-rate in, 90.
- Pulmonary ventilation under basal conditions, 88.
- Pulse-rate in pulmonary tuberculosis, 90.
- Respiration and posture, the effect of, on the electrical axis of normal hearts, 68; in pulmonary tuberculosis, 91.
- Respiratory exchange and basal metabolic rate, observations on the, in pulmonary tuberculosis, 85.
- Rheumatic carditis, the main branches of the coronary arteries in acute, 241.
- Right branch bundle block, on the clinical significance of, 261.
- Sclerosis, disseminated, 343; distribution and incidence of, 344; pathology, 349; pathogenesis, 353; experimental transmission and bacteriology, 359; symptomatology, 368; treatment, 378; relationship to other diseases, 381.
- Skin temperatures, measurement of, 443; instrument for measuring, 443; application of thermometer, 444.
- Specific treatment of visceroptosis, 46.
- Sphincter, cardiac, anatomy of the, 493; nervous disorders of, 496; achalasia of, 497.
- Sprue, studies on, with special reference to treatment, 411; sex and age incidence in, 412; predisposing causes, 414; mortality of, 415; special aspects as affecting the female, 417; analysis of special symptoms and signs of, 418; abdominal symptoms of, 420; blood picture in, 421; muscular cramps and tetany, 423; observations on blood-pressure in, 423; sigmoidoscopic appearances of bowel in, 424; pancreas in, 424; digestive tract in, 425; pyrexia in, 425; emaciation in, 425.
- Stomach, chloride content of, the action of histamine on the, 447.
- Storage of iron following its oral and subcutaneous administration, 77.
- Sympathetic and parasympathetic nerves, neurofibromatosis of, 155.
- Tetany, calcium and phosphorus metabolism in chronic diarrhoea with, 195; and sprue, 423.
- Thyroxin, an inquiry into the fate of, in the treatment of nephrosis, 129.
- Tuberculosis, pulmonary, basal metabolism in, 87; respiratory exchange and metabolic rate, observations in, 85; pulse-rate in, 90.
- Ventricular complexes in myocardial infarction and fibrosis, 273.
- Ventricular predominance, electrical axis of the heart as an indicator of changes in, 67; changes in, with alteration in cardiac rhythm, 74.
- Viscera, neurofibromatosis of, 155.
- Visceroptosis and allied abdominal conditions associated with chronic invalidism, a review of, 1; symptoms of, 25; physical findings in, 32; diagnosis, 36; specific treatment of, 46.
